

Case Study # 1

\$14 Million in Annual Parcel Expense

Service	Annual Savings	Description
Backdata Analysis	\$750,000	BridgeNet audited 14 months of backdata to determine a savings amount of over \$950,000. The bills were already paid and the carrier negotiated a onetime payment of \$750,000 to the customer.
Auditing	\$480,000	BridgeNet was able to credit over \$480,000 in carrier caused overcharges.
Expense Analysis	\$2,750,000	BridgeNet restructured the client's characteristics providing accurate profitability ratios to the carrier.
Middleware Software	\$1,800,000	BridgeNet was able to implement customized software that aggregates orders together before they are sent to pick, pack and ship. This process forces a complete order to be sent at the same time, which increases profitability to the carrier.
Carrier Enhanced Software	\$300,000	Complied with carrier request for detailed Package Level Detail real time upload. Enhances carriers forecasting abilities.
<u>Total Annual Savings</u>	<u>\$6,080,000</u>	<u>Combined annual savings for all BridgeNet Services.</u>
