

Case Study # 2

\$6 Million in Annual Parcel Expense

Service	Annual Savings	Description
Realign Shipper Numbers	\$75,000	BridgeNet was able to eliminate over 500 unused or unauthorized shipper numbers that were created by client personnel throughout years of shipping parcel. Each unused or underused shipper number had a weekly service charge. BridgeNet was also able to determine that much of the shipments on the unauthorized shipper numbers were not work related shipments.
Auditing	\$120,000	BridgeNet was able to credit over \$120,000 in carrier caused and shipper caused overcharges.
Expense Analysis	\$1,450,000	BridgeNet restructured the client's characteristics providing accurate profitability ratios to the carrier. BridgeNet was able to reduce the number of global carriers used from 3 to 2. This created a savings within the client's rates with the carriers
Middleware Software	\$60,000	BridgeNet integrated shipping systems to the client's 3 different accounting systems to eliminate manual labor within their largest distribution centers.
<u>Total Annual Savings</u>	<u>\$1,705,000</u>	<u>Combined annual savings for all BridgeNet Services.</u>
