## Xonar®

Manage complex supply chains with Xonar®, the network spend data analytics and planning solution that uses advanced optimization technology to give you a global view.

### The BridgeNet Advantage:

- Founded in 2001, BridgeNet has been 100% CAGR for five straight years.
- Clients have achieved reductions in annual cost savings of up to 40%.
- The highest quality logistics data analytics and bestpractices solutions are the BridgeNet standard.
- We maintain excellent working relationships with all Carriers.
- BridgeNet's Executive Team is made up of experienceddata analytics, supply chain operations and logistics professionals that you can trust.

Do you have a **global view** of your company's shipments?

Do you have **complete control** over the cost of each shipment within your supply chain?

Does your team **follow** your company's logistics guidelines?

XONAR® is a network spend data analytics and planning solution that uses advanced optimization technology to manage the world's most complex supply chains. This powerful solution enables supply chain professionals to perform quick analyses and assessments of their global transportation costs and service requirements, as well as the calculation of the optimal network configuration for different cost and service objectives.

## The XONAR® eSuite

### eLERTS – Operational Alerts Tool

XONAR® informs the client that the excess expense occurred due to an inefficient mode. The client's designated personnel view the expense by receiving an eLERT.

### ePOD – Electronic Proof of Delivery Tool (POD)

The user logs in to a XONAR® web tool and performs a tracking request which will allow them to receive digital POD by signature.

### eSTATS – Statistical processing - Data Analytics Tool

The user creates unlimited statistical reports specific to their global logistics network.

### eREPORTS – Reporting options - Global Information Tool

This operational management tool that allows the user to view auditing, reporting and historical reports.

### eSCRIBE – Subscription tool - Operational Management Tool

The user logs in and selects a reports from a menu. The reports are then sent to a selected end user on a weekly basis.
