[Why BridgeNet](#)

BridgeNet Solutions Powered by Xonar, specializes in data analytics relative to transportation. Xonar is our cloud based data warehouse that enables real time analytics and benchmarking allowing companies to easily manage complex global supply chains. Xonar's capabilities span across all modes of transportation; Full Truckload, Less than Truckload, Ocean Freight, Air Freight, Intermodal, Parcel and Courier.

[Xonar Dashboard](#)

Take your companies Business Intelligence to the next level with Xonar, BridgeNet's cloud based data warehouse that enables real time analytics and benchmarking allowing companies to easily manage complex global supply chains.

[Consulting](#)

Market Intelligence Analysis (Benchmarking). Supply Chain Consulting & Operational Enhancements. IT Supply Chain Programming & Integration. Due Diligence Evaluation. Sarbanes-Oxley Supply Chain Audit.

[Control Tower](#)

Within global supply chains, coordinating shipment activity in real-time is a complex task, and often times requires extensive labor hours to manage effectively. A technological solution to increase visibility into each aspect of this process, and to execute each aspect is referred to as a Control Tower.

[Auditing/Reporting](#)

BridgeNet offers a comprehensive weekly audit suite that includes carrier auditing, reporting and general ledger coding. We are a full-service audit firm handling all modes of transportation domestically and Internationally.

[Due Diligence](#)

As part of Mergers and Acquisitions, a company should be performing a quantitative evaluation of the supply chain network and expenses of the new company prior to investment or purchase. BridgeNet Solutions can work with multiple types of data sets obtained through the standard Due Diligence process in order to evaluate what potential cost-savings opportunities would be available after completion of the M&A.
