

## **Business Intelligence Analyst**

*Founded in 2001, we are a leading Supply-Chain data analytics and managed services provider. Our clients include Fortune 500 companies and portfolio companies of leading and well respected private equity firms. We are currently experiencing a rapidly growing demand for our services and are building an organization and implementing processes to efficiently scale. We are located in Chicago in the River North area. BridgeNet Solutions offers a unique working environment with a strong focus on its employees. BridgeNet offers a very competitive benefits and commission program and maintains an even more impressive employee retention rate. Many of our full-time employees have been with the company for more than half of BridgeNet's existence.*

*We are constantly striving to be leaders not only in the industry, but in the community as well. We pursue unique ways to help our clients and clients all the while searching for new ways to be active within our neighborhood and try and make a difference locally. Chicago gives us a wide variety of cultures and activities to support. We are always looking to join local community initiatives and actively participate in urban outreach programs.*

The primary responsibility for the Business Intelligence Analyst is to identify, analyze, aggregate and interpret trends or patterns in complex and various large data sets. This person will develop and maintain advanced reporting, analytics, dashboards, and other BI solutions using Tableau. Additionally, there is a need to invent creative and innovative ways to answer key business questions by leveraging existing data assets or finding new ones. The Business Intelligence Analyst will need to develop a strong understanding of the business, strategic direction, organizational structure and overall business goals.

Here's what we're looking for:

- Provide clients with valuable content to assist in reviewing supply chain and transportation metrics.
- Help onboard new technology and enhancing existing products
- Communicate with Global Account Directors (GADs) to continue servicing clients and meeting all business needs.
- Thorough communication within team, as well as with the business and our client base
- Develop and delivers knowledge transfer to our GADs and clients
- Create advanced tableau visualizations using action filters, user filters, advanced navigation techniques, and level of detail expressions.

Here's what you HAVE to HAVE:

- Bachelor's Degree in a related field is preferred
- 2+ years of background developing Data Visualization solutions using Tableau or equivalent software
- Solid experience working in Supply Chain/Transportation industry

- A team player mentality, but possessing ability to stay independently motivated
- Possess the ability to design innovative solutions
- Excellent oral and written communication skills
- Analytical and problem-solving skills to evaluate business problems and apply technology and industry knowledge to identify appropriate solutions
- Advanced computer skills, including full proficiency with Microsoft Office Suite

Here's what would be a bonus:

- Tableau expertise
- Experience reporting on transportation metrics and trends
- Client-facing experience

This probably isn't the role for you IF:

- You have limited or no experience with transportation or logistics.
- You have not worked in Microsoft products, Tableau, or another BI tool
